Ventura Beach Promenade repairs continue starting May 1, 2020

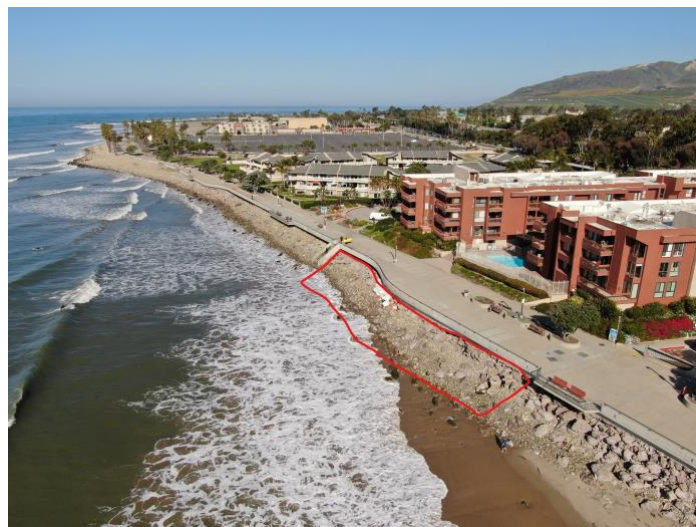

Ventura, CA – Beginning May 1, 2020, the City of Ventura will finalize repairing the Beach Promenade's foundation near Paseo De Playa. The project, funded by Measure O, consists of installing 200 linear feet of rocks weighing up to four tons to replenish the existing rock revetment and protect the area recently repaired in January. The project is anticipated to take up to one month to complete depending on weather conditions and the tide.

Work is intended to be performed Monday through Friday from 8:00 a.m. to 5:00 p.m. or later, depending on the tide. Heavy equipment will access the work area on the beach during the early weeks of construction to install rocks along the shoreline.

For safety reasons, temporary fencing surrounding the project site provides a detour path for pedestrians. A section of the parking lot at Paseo De Playa will be used for the contractor's staging area for equipment and project materials affecting parking and beach access at the nearby stairway.

Damage from recent wave action and King Tides this past winter caused significant foundation erosion beneath the Beach Promenade. Contractors performed a permitted emergency repair by filling the void to prevent the area from failing from the Coastal Commission and Army Corps of Engineers.

Our Public Works Department continues capital improvement projects throughout the City, including upcoming sidewalk repairs, street resurfacing projects, and water infrastructure improvements. For a list of current and future projects, [click here](#).
