

Barranca Vista Center Repairs and Refurbishment

Description of project: The scope of this project includes removing the existing trellis and replacing it with three powder-coated fabricated steel trellis shade structures. This project also includes repairs, concrete seating, walkways, minor lighting, drought resistant/native landscaping, and a rain garden designed to capture rain runoff from the roof of the recreation center. There will also be Americans with Disabilities Act (ADA) improvements including a replacement drinking fountain, striping and signage for the parking lot and a new ramp in the playground.
