

Hall Canyon Channel Drainage Improvements

Description of project: Construction of approximately 700 linear feet of 24” to 36” diameter stormdrain on Fairview Drive to divert stormwater flow from an undersized and inundated open channel that runs through an easement between residential lots. The project also includes construction of 2 stormwater inlet basins at the east end of Foster Avenue. Completion of this project will mitigate flooding that occurs in that area.

Estimated construction: September 2020 - January 2021

Whom to Call Regarding this Project
Zach Bryant, Assistant Construction Manager,
805-886-0206

Robert Payer, Senior Construction Inspector,
