

VENTURA PUBLIC WORKS FLEET IS #1 LEADING FLEET IN THE NATION!

In June, 2015, **Government Fleet magazine** named the **City of Ventura's Fleet Division the #1 Small Fleet in the nation** for the second year in a row. The Fleet Division was recognized for its excellent performance particularly in fleet innovation and leadership, competitiveness and efficiency, overcoming challenges, and planning for the future. For example, the City of Ventura Fleet Division has 8 practices that are national models for the fleet industry as deemed by a national peer review board through the APWA Accreditation process.

Fleet Staff exhibits leadership by:

- Fostering an environment of open communication and teamwork.
- Earning trust of customers by sharing ideas and partnering with them to ensure the right equipment is being used for best performance.
- Conserving energy in the community by installing electric vehicle charging stations throughout the city, [the largest number of EV charging stations in the county!](#)

The Fleet division ensures competitiveness and efficiency by comparing daily services to private vendors to deliver the most efficient performance of repairs and cost effective service.

The Fleet Team has successfully tackled tough issues such as privatization, and has a proven track record of providing competitive vehicle equipment installation and maintenance costs.

Vision for the future: Develop and expand in-house expertise in areas such as fabrication, vehicle equipment installation and maintenance, and refurbishing.
