**24V.206 Building Type Standards**

**24V.206.010 Purpose and Applicability**

**A. Purpose**

This section identifies the Building Types allowed within the Victoria Avenue Corridor Area and provides design standards for each type to ensure that new development is consistent with the City’s goals for building form, character, and quality.

**B. Applicability**

1. Each proposed building shall be designed in compliance with the standards of this Section for the applicable building type, except for public and institutional buildings, which, because of their unique disposition and application, are not required to comply with building type requirements.

2. A building type is a typical configuration of a building’s plan layout for intended use(s) and its resulting three-dimensional building mass.

3. A building type is “typical” in that its architectural style, architectural elements, and building massing issues are similar for those of its kind. Some building types are specialized for a particular use and site configuration, while others can accommodate different uses or are readily modified for other uses.

4. Each building type has an accompanying illustration that is provided as a visual aid and does not represent a specific required design or configuration. It diagrammatically indicates the type’s basic massing configuration and its relationship to front, side and back site orientations.

5. A property’s permitted Building Types shall be limited to those types specified by each Transect Zone’s Urban Standards.

**C. Lot Width**

1. Lot width is defined as the length of a lot or nominal lot’s frontage line.

2. The permitted range of lot widths for each building type shall be limited as specified by each Transect Zone’s Urban Standards.

3. Each lot or nominal lot shall be limited to 1 primary building.

4. Development increments that include multiple buildings shall include a lot or nominal lot for each building.

5. The lot width of each lot or nominal lot shall be within the range permitted by Transect Zone.
D. Pedestrian Access

The relatively large Victoria Corridor blocks and resulting deep lots often accommodate buildings within the block that do not have direct frontage on any of the block-bounding streets.

Pedestrian Access regulations ensure that all dwelling units and/or residential lobbies, independent of their location within a block, have access to and are connected with the public realm.

1. The public realm shall extend into the block in the form of new streets, paseos and/or interconnected courtyards that provide direct access to a public street.

2. Paseos and courtyards are limited to pedestrian traffic.

3. In no case may a vehicular driveway be the sole means of access to a dwelling or multi family building.

4. Permitted building types shall be arranged around and take their primary access from this semipublic extension of the public realm.

5. Semi-public paseos and courtyards that serve as an extension of the public realm shall have the following minimum dimensions:

   a. Paseos shall be a minimum of 15 feet wide between primary building walls. Architectural encroachments are not permitted.

   b. Courtyards shall be at minimum 30 feet wide. Architectural encroachments are permitted as per the Zones & Development Standards.

E. Orientation

1. Street facing facades and all facades containing main entrances shall be designed as front facades.

2. Dwellings shall be designed so that living areas, rather than sleeping areas and service rooms, shall be oriented toward courtyards and fronting street(s) to the degree possible. Service rooms shall be oriented to side yards and service yards to the degree possible.

3. The orientation of primary roof ridges of a new building should align with those of existing homes on the facing and same-side block (i.e. parallel or perpendicular to the street) if one direction is predominant for more than 3/4 of existing buildings.

4. Side yard windows and doors should be located, sized, and otherwise configured to avoid privacy conflicts with neighboring buildings.

5. On corner lots, unit entrances to dwellings should be provided on both street frontages where possible.

6. Windows and doors should be located, sized, and otherwise configured to avoid privacy conflicts with neighboring dwellings and buildings.
24V.206.020 Carriage House and Second Unit

A. Description

This building type consists of a dwelling unit stacked above or attached at grade to a garage, located on an alleyway at the rear of a lot that includes a main residence building that is one of the following Building Types: Rowhouse, Duplex, Triplex, Quadplex, Single Family Detached – Front Yard, or Single Family Detached – Side Yard.

Carriage Houses typically abut an alleyway at the rear of a lot that also includes a Front Yard or Side Yard House. In compliance with State Planning Law, performance standards for Carriage Houses are mandatory and no variance may be granted. Carriage Houses approval is ministerial without public hearing. Carriage homes shall be designed as flats located above or attached at grade to garages.

B. Access

1. Entrance stairs shall be located on the side or rear yard of the building.

2. The main entrance to the dwelling unit shall be accessed from the side yard setback, side street setback, or rear yard setback.

3. Where an alley is present, parking and services shall be accessed through the alley. [E]

C. Parking and Services

1. Required parking for one car shall be within a garage. The remainder of required parking may be provided in a garage, carport or as open. [W]

D. Open Space

1. Carriage Houses and garages may occupy no more than 30% of that area illustrated by Diagram C (Parking and Services Placement) of the applicable zone. (See Sections 24V.200.040, 24V.200.050)

2. One private yard of no less than 150 s.f. with a minimum dimension of 10’ shall be provided at-grade or via a balcony not oriented toward a side yard setback.

3. On a lot without an alley, a Carriage House shall have a minimum rear yard setback of 10’ and a minimum side yard setback of 5’.
E. **Landscape**
   1. One canopy tree shall be provided for shade and privacy within the rear 50% of the lot.

F. **Frontage**
   1. As Carriage Houses are located in the rear of lots, no frontage type is required since direct access from the street is not possible.

G. **Building Size and Massing**
   1. Carriage houses shall be designed as flats located above or attached, at-grade to detached garages.
   2. Carriage Houses located above garages shall be no taller than 2 stories (inclusive of garage) at 12’ max. per floor.
   3. Carriage Houses located attached, at-grade to garages shall be no taller than 1 story at 12’ max. per floor.
   4. Carriage houses shall be a min. size of 750 s.f. habitable floor area.
   5. Carriage houses shall not exceed 50% of primary building’s habitable floor area.
24V.206.030 Front Yard House

A. Description

A detached building designed as a single dwelling unit that may be located upon a qualifying lot in the T4.5 zone. A Front Yard House may be used for non-residential purposes where allowed under E (Allowed Land Uses) of the applicable zone. (Section 24V.200.040 and 24V.200.050) A Front Yard House is accessed from the sidewalk adjacent to the front street. The following text provides performance standards for Front Yard Houses.

B. Access

1. The main entrance shall be located within the façade and accessed directly from the street through an allowed frontage type. [W]
2. Where an alley is present, parking and services shall be accessed through the alley. [E]
3. Where an alley is not present, parking and services shall be accessed by way of a driveway 7 to 10 feet wide, and with 2’ min. planters on each side. [W]
4. On a corner lot without access to an alley, parking and services shall be accessed by a driveway of 18’ maximum width, and with 2’ planters on each side. [W]

C. Parking and Services

1. Required parking for one car shall be within a garage. The remainder of required parking may be provided in a garage, carport or as open. [W]
2. An alley accessed or non-alley accessed garage or carport may accommodate up to three cars.
3. Parking facing a side street shall be accommodated in a two-car garage with one-car garage doors. [W]
4. Where an alley is present, services, above ground equipment, and trash container areas should be located on the alley.
5. Where an alley is not present, above ground equipment and trash container areas shall be located at least 10’ behind the façade of the house and be screened from view from the street with landscaping or a fence. [W]

D. Open Space

1. One usable, outdoor space shall be provided behind the Front Yard House at no less than 15% of the area of each lot and of a regular geometry (e.g., rectangular) with a minimum dimension of 20’. [W]
E. Landscape

1. Landscape is encouraged to not separate a front yard from front yards on adjacent parcels. Front yard trees are encouraged to be of porch scale (no more that 1.5 times the height of the porch at maturity) except at the margins of the lot, where they may be of house scale (no more that 1.5 times the height of the house at maturity).

2. Side yard trees may be placed to protect the privacy of neighbors.

3. At least one large tree is encouraged for planting within each rear yard for shade and privacy.

F. Frontage

1. Other than Frontage Type performance measures, there are no additional frontage requirements for this building type.

G. Building Size and Massing

1. Building elevations abutting side yards shall be designed to provide at least one horizontal plane break of at least three feet and one vertical break. [DR]

2. Houses on corner lots shall be designed with two facades of equal architectural expression. [DR]

3. Buildings shall be composed of one and/or two story volumes, each designed to house scale. [DR]
24V.206.040 Side Yard House

A. Description

A detached building designed as a single dwelling unit that may be located upon a qualifying lot in the T4.5 zone. A Side Yard House may be used for non-residential purposes where allowed under Allowed Land Uses of the applicable zone. (Section 24V.200.040 and 24V.200.050) A Side Yard House is flanked by a side yard of a width comparable to the street maximum setback line and is accessed via a walkway parallel to that yard area. The following text provides performance standards for Side Yard Houses.

B. Access

1. The main entrance shall be accessed directly from the street through an allowed frontage type or side yard area equal in width to the street maximum setback line. [E]
2. Where an alley is present, parking and services shall be accessed through the alley. [E]
3. Where an alley is not present, this type is allowed only on a corner lot. [E]
4. For a corner lot without access to an alley, parking and services shall be accessed by a driveway of 18’ maximum width, and with 2’ planters on each side. [W]

C. Parking and Services

1. Required parking for one car shall be within a garage. The remainder of required parking may be provided in a garage, carport or as open. [W]
2. An alley accessed garage or carport may accommodate up to three cars. A non-alley-accessed garage or carport may accommodate no more than 2 cars. Parking facing a side street must be accommodated in a garage (carports are not allowed). A side street facing garage shall have 1-car garage doors. [W]
3. Where an alley is present, services, above ground equipment, and trash container areas should be located on the alley.
4. Where an alley is not present, above ground equipment and trash container areas shall be located at least 10’ behind the façade of the house and be screened from view from the street with landscaping or a fence. [W]

D. Open Space

1. One side yard shall provide usable, outdoor space not less than 15’, with ground floor living areas (e.g., living room, family room, dining room, etc.) opening to it with large windows and, where possible, French doors. This side yard shall be enclosed by a wall or hedge no more than 6’ high, and shall encompass no less than 15% of the area of each lot and of a regular geometry (e.g., rectangular). [E]
2. On a corner lot, the side yard required by D.1 above, shall abut the street, and the enclosing wall or hedge shall be set back at least 5’ from property line with a height of no more than 6’. The opposite side yard may not have a fence at the property line, with an easement instead allowing use of the yard by the neighbor. Windows facing this opposing yard shall be relatively small and high, providing light and ventilation while allowing for privacy. [E]
E. Landscape

1. Landscape should not be used to separate a front yard from front yards on adjacent parcels.

2. Trees in the front yard should be of porch scale (no more that 1.5 times the height of the porch at maturity) except at the margins of the lot, where they may be of house scale (no more that 1.5 times the height of the house at maturity).

3. Trees may be placed in side yards to protect the privacy of neighbors.

4. At least one large tree shall be provided in each rear yard for shade and privacy. [DR]

F. Frontage

1. This building type shall provide a permitted frontage type or within the side yard required by Section D (Open Space) above. [E]

2. Notwithstanding setback requirements of the applicable zone, the front setback need not exceed 10'. [W]

3. A gallery, either one or two stories in height, or an arcade frontage type shall occur for at least half the building length along the building elevation facing the side yard required by Section D (Open Space) above. [DR]

4. Because a frontage type is not mandatory at the front street, special care should be taken to ensure that the composition of fenestration and other architectural details are scaled to the public rooms of the house.

G. Building Size and Massing

1. Building elevations abutting side yards shall be designed to provide at least one horizontal plane break of at least 3' and one vertical break. Architectural elements such as bay windows, projecting rooms or covered balconies may be provided in lieu of one plane break. [DR]
24V.206.050 Duplex, Triplex, Quadplex

A. DESCRIPTION

A building containing two, three, or four dwelling units that may be located upon a qualifying lot in the T4.5 zone. Each dwelling unit is individually accessed directly from the street. A Duplex, Triplex, Quadplex may be used for non-residential purposes where allowed under E (Allowed Land Uses) of the applicable zone. (Section 24V.200.040 and 24V.200.050) The following text provides performance standards for Duplex, Triplex, Quadplexes.

B. ACCESS

1. Entrances to each dwelling shall be accessed directly from, and face, the street. Access to second floor dwellings shall be by a stairway, which may be open, roofed or enclosed. [E]

2. Where an alley is present, parking and services shall be accessed through the alley. [E]

3. Where an alley is not present, parking and services shall be accessed by way of a driveway 7’ to 10’ wide, and with 2’ planters on each side. [W]

4. On a corner lot without access to an alley, parking and services shall be accessed by driveways of 7’ to 8’ maximum width, and with 2’ planters on each side. [W]

C. PARKING AND SERVICES

1. One parking space for each dwelling unit shall be within a garage. The remaining required parking spaces may be within a garage, carports, or as open. [W]

2. Garages on corner lots without alleys may face the street only if provided with one-car garage doors, and with driveways no more than 8’ wide that are separated by planters at least 2’ wide. Garages facing a side street shall not accommodate more than four cars. [W]

3. Where an alley is present, services, above ground equipment, and trash container areas should be located on the alley.

4. Where an alley is not present, above ground equipment and trash container areas shall be located at least 10’ behind the façade of the building and be screened from view from the street with landscaping or a fence. [W]

D. OPEN SPACE

1. Each dwelling at the first floor shall have a usable, outdoor space of at least 150 s.f. with a minimum dimension of 8’. [W]

2. Each dwelling accessed above the first floor shall have a usable, outdoor space that may be in balconies or loggias and of at least 150 s.f. with a minimum dimension of 7’. [W]

3. Dwellings accessed at the first floor should provide outdoor space at-grade that is enclosed by landscaping or a wall.
E. **LANDSCAPE**

1. Landscape should not be used to separate a front yard from front yards on adjacent parcels. Front yard trees should be of porch scale (no more that 1.5 times the height of the porch at maturity) except at the margins of the lot, where they may be of house scale (no more that 1.5 times the height of the house at maturity).

2. Trees may be placed in side yards to protect the privacy of neighbors.

3. At least one large tree shall be provided in the rear yard for shade and privacy. All parcels abutting residentially zoned parcels shall provide buffer landscaping to screen and minimize building mass as determined by the Decision-Making Authority. [DR]

F. **FRONTAGE**

1. On corner lots, dwellings are encouraged to obtain access through a permitted frontage type from either street, particularly in triplexes and quadplexes.

G. **BUILDING SIZE AND MASSING**

1. Building elevations abutting side yards shall be designed to provide at least one horizontal plane break of at least 3’ and one vertical break. Architectural elements such as bay windows, projecting rooms or covered balconies may be provided in lieu of one plane break. [DR]

2. Buildings on corner lots shall be designed with two facades of equal architectural expression. [DR]

3. Buildings shall be massed as large houses, composed principally of two story volumes, each designed to house scale. [DR]

4. Dwellings within buildings may be flats and/or townhouses.
A. DESCRIPTION

A large house containing anywhere from two to eight dwelling units. Each dwelling unit is individually accessed from a central lobby, which in turn is accessed directly from the street. A Villa may be used for non-residential purposes where allowed under E (Allowed Land Uses) of the applicable zone. (Section 24V.200.040 and 24V.200.050)

The following text provides performance standards for Villas.

B. ACCESS

1. Access to the building shall occur directly from and face the street. Said access shall be a single point leading to a central lobby which provides access to the individual dwellings without use of a corridor. Second floor dwellings shall be accessed by a stair located in the lobby and, again, without use of a corridor. [E]

2. Where an alley is present, parking and services shall be accessed through the alley. [E]

3. On an interior lot without access to an alley, parking and services shall be accessed by a driveway 7’ to 10’ wide, and with 2’ planters on each side. [W]

4. On a corner lot without access to an alley, parking and services shall be accessed from the side street by driveways of 7’ to 8’ maximum width, and with 2’ planters on each side. [W]

5. Subterranean parking entrances should be located as close as possible to the side or rear of each lot.

C. PARKING AND SERVICES

1. If provided at-grade, one parking space for each dwelling unit shall be within a garage. The remaining required parking spaces may be within a garage, carport, or as open. [W]

2. Garages on corner lots without alleys may face the side street only if provided with one-car garage doors, and with driveways no more than 8’ wide that are separated by planters at least 2’ wide. Garages facing a side street shall not accommodate more than four cars. [W]

3. Where an alley is present, services, above ground equipment, and trash container areas should be located on the alley.

4. Where an alley is not present, above ground equipment and trash container areas shall be located at least 10’ behind the façade of the building and be screened from view from the street with landscaping or a fence. [W]

D. OPEN SPACE

1. Rear yards shall contain a usable, outdoor space of no less than 15% of the area of each lot and of a regular geometry (e.g., rectangular). This yard area is intended for common use by all dwelling occupants. [E]

2. Dwelling units accessed above the first floor may provide usable, outdoor space in balconies or loggias with a minimum dimension of 7’.

3. Dwelling units accessed at the first floor may provide usable, outdoor space, exclusive of the common yard area required above.
E. **Landscape**

1. Landscape shall not be used to separate a front yard from front yards on adjacent parcels. [DR]

2. Front yard trees should be of porch scale (no more than 1.5 times the height of the porch at maturity) except at the margins of the lot, where they may be of house scale (no more than 1.5 times the height of the house at maturity).

3. Trees may be placed in side yards to protect the privacy of neighbors.

4. At least one large tree should be provided in each rear yard for shade and privacy.

5. All parcels abutting residentially zoned parcels shall provide buffer landscaping to screen and minimize building mass as determined by the Decision-Making Authority. [DR]

F. **Frontage**

1. Other than Frontage Type performance measures, there are no additional frontage requirements for this building type.

G. **Building Size and Massing**

1. Building elevations abutting side yards shall be designed to provide at least one horizontal plane break of at least three feet, and one vertical break. Architectural elements such as bay windows, projecting rooms or covered balconies may be provided in lieu of one plane break. [DR]

2. Buildings on corner lots shall be designed with two facades of equal architectural expression. [DR]

3. Buildings shall be massed as large houses, composed principally of two story volumes, each designed to house scale. [DR]

4. Dwellings within buildings may be flats and/or townhouses.
A. DESCRIPTION

Four or more detached houses arranged around a shared courtyard, with pedestrian access to the building entrances from the courtyard and/or street. A Bungalow Court may be used for non-residential purposes where allowed under E (Allowed Land Uses) of the applicable zone. (Section 24V.200.040 and 24V.200.050) The following text provides performance standards for Bungalow Courts.

B. ACCESS

1. Entrances to dwellings shall be directly from the front yard or from the courtyard. [E]
2. Where an alley is present, parking and services shall be accessed through the alley. [E]
3. On a corner lot without access to an alley, parking and services shall be accessed from the side street by driveways of 7' to 8’ maximum width, and with 2’ planters on each side. [W]
4. On an interior lot without access to an alley, parking and services shall be accessed by a driveway 7’ to 10’ wide, and with 2’ planters on each side. [W]

C. PARKING AND SERVICES

1. Required parking shall be at-grade. One parking space for each dwelling unit shall be within a garage. The remaining required parking spaces may be within a garage, carport, or as open. [W]
2. Garages on corner lots without alleys may face the side street only if provided with one-car garage doors, and with driveways no more than 8’ wide that are separated by planters at least 2’ wide. Garages facing a side street shall not accommodate more than four cars. [W]
3. Where an alley is present, services, above ground equipment, and trash container areas should be located on the alley.
4. Where an alley is not present, above ground equipment and trash container areas shall be located at least 10’ behind the façade of the building and be screened from view from the street with landscaping or a fence. [W]

D. OPEN SPACE

1. Dwelling entrances shall face a courtyard that comprises at least 15% of the lot area and of a regular geometry (e.g., rectangular). [E]
2. Each dwelling shall have a usable, outdoor space of at least 150 s.f. with a minimum dimension of 8’. This space shall be exclusive of the courtyard and may be located in a side yard and/or the rear yard. [E]
3. Required outdoor space shall be enclosed by a fence, wall or hedge. [DR]
C. Landscape

1. Landscape shall not be used to separate a front yard from front yards on adjacent parcels. [DR]

2. Front yard trees shall be of porch scale (no more that 1.5 times the height of the porch at maturity) except at the margins of the lot, where they may be of house scale (no more that 1.5 times the height of the house at maturity).

3. Trees may be placed in side yards to protect the privacy of neighbors.

4. At least one large tree shall be provided in each rear yard for shade and privacy. All parcels abutting residentially zoned parcels shall provide buffer landscaping to screen and minimize building mass as determined by the Decision-Making Authority. [DR]

F. Frontage

1. Other than Frontage Type performance measures, there are no additional frontage requirements for this building type.

G. Building Size and Massing

1. Buildings shall be composed of one and/or two story volumes and massed as houses. [DR]

2. Building elevations abutting side yards shall be designed to provide at least one horizontal plane break of at least 3’ and one vertical break. Architectural elements such as bay windows, projecting rooms or covered balconies may be provided in lieu of one plane break. [DR]

3. Buildings on corner lots shall be designed with two facades of equal architectural expression. [DR]

4. Dwellings within the buildings may be flats and/or townhouses.
24V.206.080 Rowhouse

A. Description
Two or more detached two or three-story dwellings. A Rowhouse may be used for non-residential purposes where allowed under E (Allowed Land Uses) of the applicable zone. (Section 24V.200.040 and 24V.200.050) The following text provides performance standards for Rowhouses.

B. Access
1. The main entrance to each dwelling shall be accessed directly from and face the street. [E]
2. Parking and services shall be accessed from an alley or subterranean garage in a Mixed Type Development. This type is not allowed on a lot without an alley or outside of a Mixed Type Development. [E]

C. Parking and Services
1. Required parking for one car shall be in a garage, which may be attached to, or detached from, the dwelling. The remaining required parking spaces may be within a garage, carport, or as open. [W]
2. Corner lots shall not have garages that face the side street. [W]
3. Services, above ground equipment, and trash container areas should be located on the alley.

D. Open Space
1. One usable, outdoor space shall be provided behind the Rowhouse at no less than 15% of the lot area and of a regular geometry (e.g., rectangular) with a minimum dimension of 20’. [E]
E. Landscape

1. Landscape shall not be used to separate a front yard from front yards on adjacent parcels. [DR]

2. Front yard trees, if provided, shall be of porch scale (no more that 1.5 times the height of the porch at maturity) except at the margins of the lot, where they may be of house scale (no more that 1.5 times the height of the house at maturity).

3. At least one large tree shall be provided in each rear yard for shade and privacy. All parcels abutting residentially zoned parcels shall provide buffer landscaping to screen and minimize building mass as determined by the Decision-Making Authority. [DR]

F. Frontage

1. Other than Frontage Type performance measures, there are no additional frontage requirements for this building type.

G. Building Size and Massing

1. Buildings shall be composed of 2 and/or 3-story volumes in compliance with the regulations for the applicable zone. [DR]

2. Buildings on corner lots shall be designed with two facades of equal architectural expression. [DR]

3. In a 3-story building, a townhouse dwelling may be stacked over a ground floor flat. In this case, the flat shall be accessed by its own front door at the street line, and the townhouse dwelling shall be accessed by a separate front door and an internal stair. [DR]

4. In a 2-story building, the Rowhouse consists of a townhouse dwelling that is accessed from and faces the street. [DR]
24V.206.090 Live-Work

A. DESCRIPTION

An integrated housing unit and working space, occupied and utilized by a single household in a structure, either single family or multi-family, that has been designed or structurally modified to accommodate joint residential occupancy and work activity at the ground floor. Non-residential uses are identified under E (Allowed Land Uses) of the applicable zone. (Section 24V.200.040 and 24V.200.050) The following text provides performance standards for Live-work buildings.

B. ACCESS

1. Live-Work buildings have one of two methods of pedestrian access. Both methods segregate access to residential occupancy and work activity in either of the following manners:

   a. The main entrance to the ground floor flex space shall be accessed directly from and face the street, and the upstairs residential occupancy area shall be accessed by a separate entrance and internal stair that is also accessed from and faces the street; or [E]

   b. The main entrance to the ground floor flex space shall be accessed directly from and face the street, and the upstairs residential occupancy area shall also be accessed by that same entrance but the ground level floor plan shall control access between floor levels through use of a small lobby, room partitions and doors. The intention is to prevent residential occupants and/or guests from needing to traverse through the flex space. [E]

2. Parking and services shall be accessed from an alley or subterranean garage in a Mixed Type Development. This type is not allowed on a lot without an alley or outside of a Mixed Type Development. [E]

C. PARKING AND SERVICES

1. Required parking for one car shall be in a garage, which may be attached to, or detached from, the dwelling. The remaining required parking spaces may be within a garage, carport, or as open. [W]

2. Corner lots shall not have garages that face the side street. [W]

3. Services, above ground equipment and trash container areas shall be located on the alley. [W]

D. OPEN SPACE

1. One usable, outdoor space shall be provided behind the Live-Work building at no less than 15% of the lot area and of a regular geometry (e.g., rectangular) with a minimum dimension of 20'. [E]
E. Landscape

1. Landscape shall not obscure front yards on adjacent lots or the front of the ground floor flex space. Front yard trees, if provided, shall be of porch scale (no more that 1.5 times the height of the porch at maturity) except at the margins of the lot, where they may be of house scale (no more that 1.5 times the height of the house at maturity). [DR]

2. At least one large tree shall be provided in each rear yard for shade and privacy. All parcels abutting residentially zoned parcels shall provide buffer landscaping to screen and minimize building mass as determined by the Decision-Making Authority. [DR]

F. Frontage

1. As a building that provides both residential and non-residential uses, the commercial/flex space on ground floors should be oriented toward the street to allow pedestrian exposure and direct access to the commercial/flex space.

G. Building Size and Massing

1. Buildings shall be composed of 2 and/or 3-story volumes in compliance with the height limitations of the applicable zone. [DR]

2. Buildings on corner lots shall be designed with two facades of equal architectural expression. [DR]
24V.206.100 Side Court Housing

A. Description

A building or group of buildings containing dwelling units arranged on a lot in a row with the first unit facing the street. The primary entrance to each unit is from the side yard or, in the case of units facing the street, the front yard. Side Court Housing may be used for non-residential purposes where allowed by under E (Allowed Land Uses) of the applicable zone. (Section 24V.200.040 and 24V.200.050)

A Side Court Building is flanked by a side yard or court of a width comparable to the street maximum setback line and dwellings are accessed via a walkway parallel to that area. The following text provides performance standards for Side Court Housing.

B. Access

1. Entrances to dwellings shall be directly from the front yard or side yard area equal in width to the street maximum setback line. Access to no more than three (3) second-story dwellings shall be through an open or roofed (but not enclosed) stair. [E]

2. Where an alley is present, parking and services shall be accessed through the alley. [E]

3. Where an alley is not present, parking and services shall be accessed by way of a driveway 7’ to 10’ wide, and with 2’ planters on each side. [W]

4. On a corner lot without access to an alley, parking and services shall be accessed by driveways of 7’ to 8’ maximum width, and with 2’ planters on each side. [W]

C. Parking and Services

1. Required parking may be at-grade or as subterranean. If provided at-grade, one parking space for each dwelling unit shall be within a garage. The remaining required parking spaces may be within a garage, carport, or as open. [W]

2. Dwellings may have direct on indirect access to their parking stalls(s), or direct access to stalls enclosed within the garage. A combination of these conditions is encouraged.

3. Where an alley is present, services, above ground equipment, and trash container areas should be located on the alley.

4. Where an alley is not present, above ground equipment and trash container areas shall be located at least 10’ behind the façade of the building and be screened from view from the street with landscaping or a fence. [W]

5. Parking entrances to subterranean garages and/or driveways should be located as close as possible to the side or rear of each lot.
D. OPEN SPACE

1. Dwellings shall face an active side yard with a minimum dimension of 20'. [E]

2. Major ground floor rooms shall be open to the active side yard with large windows and, where possible, doors. [DR]

3. When located in an active side yard, a driveway shall be integrated into the design of the yard through the use of a reduced paved area, permeable paving materials or comparable surface area that provides a landscaped aesthetic and usable outdoor space. [DR]

4. Rear yards are not required for this type, as the private, useable outdoor space is provided in the side yard. [E]

E. LANDSCAPE

1. Landscape shall not be used to separate a front yard from front yards on adjacent parcels. [DR]

2. Front yard trees should be of porch scale (no more that 1.5 times the height of the porch at maturity) except at the margins of the lot, where they may be of house scale (no more that 1.5 times the height of the house at maturity).

3. Trees may be placed in side yards to protect the privacy of neighbors.

4. At least one large tree shall be provided in each rear yard for shade and privacy. All parcels abutting residentially zoned parcels shall provide buffer landscaping to screen and minimize building mass as determined by the Decision-Making Authority. [DR]

F. FRONTAGE

1. Each ground level dwelling shall have a frontage type that may not encroach into the active sideyard. [W]

G. BUILDING SIZE AND MASSING

1. Buildings shall be massed to the street as large houses of primarily two story volumes, and to the side yards as one-and two-story masses at the scale of houses. [DR]

2. The building elevation abutting an inactive side yard shall be designed to provide at least one horizontal plane break of at least three feet, and one vertical break. [DR]

3. Buildings on corner lots shall be designed with two facades of equal architectural expression. [DR]

4. Dwellings within the buildings may be flats and/or townhouses.
24V.206.110 Courtyard Housing

A. Description
A group of dwelling units arranged to share one or more common courtyards upon a qualifying lot. Dwellings take access from the street or the courtyard(s). Dwelling configuration occurs as townhouses, flats, or flats located over or under flats or townhouses. The courtyard is intended to be a semi-public space that is an extension of the public realm. Courtyard Housing may be used for non-residential purposes where allowed under E (Allowed Land Uses) of the applicable zone. (Section 24V.200.040 and 24V.200.050) The following text provides performance standards for Courtyard Housing.

B. Access
1. The main entrance to each ground floor dwelling shall be directly off a common courtyard or directly from the street. [E]
2. Access to no more than three second story dwellings shall be through an open or roofed (but not enclosed) stair. [W]
3. Except for dwellings occurring at the fourth story, elevator access from subterranean parking may be provided between the garage and podium only. [W]
4. Where an alley is present, parking and services shall be accessed through the alley. [E]
5. Where an alley is not present on an interior lot, parking and services should be accessed from the street by a driveway near the side lot line and be flanked by planters, at least 1’ wide.
6. On a corner lot without access to an alley, parking and services shall be accessed by driveways of 7’ to 8’ maximum width, and with 2’ planters on each side. [W]

C. Parking and Services
1. Required parking may be at-grade or as subterranean. If provided at-grade, one parking space for each dwelling unit shall be within a garage. The remaining required parking spaces may be within a garage, carport, or as open. [W]
2. Dwellings may have direct on indirect access to their parking stall(s) or direct access to stalls enclosed within the garage. A combination of these conditions is encouraged.
3. Where an alley is present, services, above ground equipment, and trash container areas should be located on the alley.
4. Where an alley is not present, above ground equipment and trash container areas shall be located at least 10’ behind the façade of the building and be screened from view from the street with landscaping or a fence. [DR]
5. Parking entrances to subterranean garages and/or driveways should be located as close as possible to the side or rear of each lot.

D. Open Space
1. Minimum courtyard dimensions shall be 30’x30’. [W]
2. Courtyard housing shall be designed to provide a central courtyard and/or partial, multiple, separated or interconnected courtyards with a cumulative total of at least 15% of the lot. [E]
3. Private patios may be provided in side and rear yards and in courtyards.
4. Courtyards shall be connected to the public way and/or to each other by zaguanos, or paseos. [E]
5. Zaguanos shall be a minimum of 10’ wide. [W]
6. Paseos shall be a minimum of 15’ wide. [W]
E. **Landscape**

1. Landscape shall not be used to separate a front yard from front yards on adjacent parcels. [DR]

2. Front yard trees should be of porch scale (no more that 1.5 times the height of the porch at maturity) except at the margins of the lot, where they may be of house scale (no more that 1.5 times the height of the house at maturity).

3. At least one large tree shall be provided in each rear yard for shade and privacy. All parcels abutting residentially zoned parcels shall provide buffer landscaping to screen and minimize building mass as determined by the Decision-Making Authority. [DR]

4. Trees may be placed in side yards to protect the privacy of neighbors.

5. At least one large tree planted directly in the ground shall be provided in at least one courtyard for shade, privacy and scale. [DR]

6. Courtyards located over garages should be designed to avoid the sensation of forced podium hardscape through the use of ample landscaping.

F. **Frontage**

7. Entrance doors, living space (e.g., living rooms and dining rooms) shall be oriented toward courtyards and the street to the degree possible. Service rooms shall be oriented to side and rear yards to the degree possible. [DR]

8. No arcade or gallery may encroach into the required minimum width of a courtyard. [W]

9. Stoops up to 3’ in height and dooryards up to 2’ in height may be placed above subterranean parking, provided that they are landscaped and scaled to the street and building. [W]

10. Dooryards that face and/or encroach into a courtyard shall be a minimum of 10’ wide. [W]
A. Description

A residential building comprised of flats and/or other residential units that does not meet the requirements of any other building type herein. Stacked Dwelling buildings may be used for non-residential purposes where allowed under E (Allowed Land Uses) of the applicable zone. (Section 24V.200.040 and 24V.200.050) The following text provides performance standards for Stacked Dwelling.

B. Access

1. The entrance to the building shall be through a street level lobby or through a combination of street/podium lobby directly accessible from the street. [E]
2. The main entrance to each ground floor dwelling shall be directly from the street. Secondary access may be through an elevator and corridor. Stacked Dwelling buildings within the T5 zone must have non-residential uses at the ground level. [E]
3. Elevator access shall be provided between the subterranean garage and each level of the building where dwelling access occurs. [W]
4. Interior circulation to each dwelling shall be through a single or double-loaded corridor. [E]
5. Where an alley is present, parking shall be accessed through the alley. [E]
6. Where an alley is not present, parking shall be accessed from the street through the building. [E]
7. On a corner lot without access to an alley, parking shall be accessed from the side street through the building. [E]
8. Dwellings can be accessed via a single-loaded, exterior corridor, provided the corridor is designed per the following requirements:
   a. The open corridor length does not exceed 40 feet. [W]
   b. The open corridor is designed in the form of a Monterey balcony, a loggia, a terrace, or a wall with window openings.

C. Parking and Services

1. Required parking may be at-grade or as subterranean. If provided at-grade, parking spaces may be within a garage, carport, or as open. [W]
2. Dwellings may have indirect access to their parking stalls.
3. Where an alley is present, services, above ground equipment, and trash container areas should be located on the alley.
4. Where an alley is not present, above ground equipment and trash container areas shall be located at least 10’ behind the façade of the building and be screened from view from the street with landscaping or a fence. [DR]
5. Parking entrances to subterranean garages and/or driveways should be located as close as possible to the side or rear of each lot.
D. **Open Space**

1. The primary shared open space is the rear yard, which shall be designed as a courtyard. Courtyards may be located on the ground or on a podium. Side yards may also be provided for common use gardens. [E]

2. Minimum courtyard dimensions shall be 30’x30’. [W]

3. Courtyards shall not be of a proportion of less than 1:1 between their width and height. [W]

4. Private patios may be provided in side and rear yards.

E. **Landscape**

1. Front yard trees, if used, shall be less than the height of the buildings, except at the margins of the lot, where they may be used to frame and separate the building from its neighbors. [DR]

2. Trees may be placed in side yards to create a particular sense of place.

3. At least one large tree shall be provided in the rear yard, planted directly in the ground; except for podium courtyards. All parcels abutting residentially zoned parcels shall provide buffer landscaping to screen and minimize building mass as determined by the Decision-Making Authority. [DR]

4. Courtyards located over garages shall be designed to avoid the sensation of forced podium hardscape through the use of ample landscaping. [DR]

F. **Frontage**

1. No arcade or gallery may encroach into the required minimum width of a courtyard. [W]

G. **Building Size and Massing**

1. Buildings may contain any of three dwelling type configurations: flats, townhouses, and lofts. [W]

2. Dwellings may be as repetitive or unique, as determined by individual designs.

3. Buildings shall be composed of one dominant volume flanked by secondary ones. [DR]

4. The intent of these regulations is to provide for buildings with varying heights through adherence to the applicable zones height ratios.
A. Description

A building designed for occupancy by retail, service, and/or office uses on the ground floor street frontage, with upper floors configured for commercial use or for dwelling units.

B. Access

1. The main entrance to each ground floor area shall be directly from and face the street. [E]

2. Entrance to the residential and/or non-residential portions of the building above the ground floor shall be through a street level lobby or through a podium lobby accessible from the street. [E]

3. Elevator access shall be provided between the subterranean garage and each level of the building where dwelling and/or commerce access occurs. [W]

4. Interior circulation to each dwelling shall be through a single or double-loaded corridor. [E]

5. Where an alley is present, parking shall be accessed through the alley. [E]

6. Where an alley is not present, parking shall be accessed from the street through the building. [E]

7. On a corner lot without access to an alley, parking shall be accessed from the side street through the building. [E]

8. Dwellings may be accessed via a single-loaded, exterior corridor, provided the corridor is designed per the following requirements:

9. The open corridor length does not exceed 40’. [W]

10. The open corridor is designed in the form of a balcony, a loggia, a terrace, or a wall with window openings. [DR]

C. Parking and Services

1. Required parking may be at-grade or as subterranean. If provided at-grade, parking spaces may be within a garage, carport, or as open. [W]

2. Dwellings may have indirect access to their parking stalls.

3. Where an alley is present, services, above ground equipment, and trash container areas should be located on the alley. [W]

4. Where an alley is not present, above ground equipment and trash container areas shall be located at least 10’ behind the façade of the building and be screened from view from the street with landscaping or a fence. [DR]

5. Parking entrances to subterranean garages and/or driveways shall be located as close as possible to the side or rear of each lot. [DR]

6. Utility, Trash, Recycling, Food Waste and Service Equipment, including satellite receiving dishes, transformers, and backflow devices, shall be located away from streets and enclosed or screened from view by landscaping, fencing or other architectural means. [DR]

7. Trash facilities and recycling containers must always be within structural enclosures and covered as specified in the City of Ventura Public Works “Trash/Recycling Enclosure Guidelines.” [DR]

8. Rooftop equipment must be set back a minimum of 10 feet from building walls, screened on all sides, and integrated into the overall building design. [DR]

9. Trash/recycling enclosures and other facilities serviced by trucks should be strategically placed to minimize blockage of street traffic during servicing.
D. Open Space

1. Courtyards may be located on the ground or on a podium. Side yards may also be provided for outdoor patios connected to ground floor commercial uses.

2. Courtyards, if provided, shall have a minimum dimension of 30’x30’ and shall not be of a proportion of less than 1:1 between their width and length. [W]

3. Private patios may be provided in side and rear yards.

E. Landscape

1. No private landscaping is required in front of the building.

2. Trees may be placed in side yards to create a particular sense of place.

3. At least one large tree shall be provided in the rear yard planted directly in the ground, except for podium courtyards. All parcels abutting residentially zoned parcels shall provide buffer landscaping to screen and minimize building mass as determined by the Decision-Making Authority. [DR]

4. Courtyards located over garages should be designed to avoid the sensation of forced podium hardscape through the use of ample landscaping.

F. Frontage

1. No arcade or gallery may encroach into the required minimum width of a courtyard. [W]

G. Building Size and Massing

1. Buildings may contain any of three dwelling types: flats, townhouses, and lofts. [W]

2. Dwellings may be as repetitive or unique, as determined by individual designs.

3. Buildings may be composed of one dominant volume, and may be flanked by secondary ones.

4. The intent of these regulations is to provide for buildings with varying heights. Suggested height ratios are as follows:
   a. 1.0 story: 100% 1 story.
   b. 2.0 stories: 85% 2 stories, 15% 3 stories.
   c. 3.0 stories: 85% 3 stories, 15% 4 stories.
   d. 4.0 stories: 75% 4 stories, 25% 5 stories.

5. These height ratios are maximums that may exceed that allowed by the applicable zone.

6. The visibility of elevators and of exterior corridors at the third, fourth and/or fifth stories shall be minimized by incorporation into the mass of the building. [DR]
