Description:

1. Conducted interviews of all site.

2. Identification of site by office staff and other conditioned spaces within defined area.

4. Data analysis of test results with parallel data of similar buildings with interior finishes consistent.

Note:

These criteria are for reference only and should not be considered for compliance with specific standards or codes.

Figure 6.1.3

- Plan A: Demonstration of building finishes and materials used.
- Plan B: Site plan showing all structural elements.
- Plan C: Energy performance analysis of the building.
- Plan D: Construction details and specifications.

Section 7.0

- Site Planning and Design
- Zoning and Building Codes
- Site and Utility Access
- Site Development and Construction
- Site Utilities and Services

Figure 7.1.4

- Site Plan
- Utility Plan
- Construction Details

Section 8.0

- Materials and Resources
- Sustainable Construction Methods
- Waste Management
- Water Conservation
- Energy Efficiency

Figure 8.1.5

- Material Specifications
- Energy Efficiency Calculations
- Site Waste Management Plan

Section 9.0

- Performance Monitoring and Verification
- Post-Occupancy Evaluation
- Life-Cycle Cost Analysis
- Maintenance and Operations

- Final Construction Plan

Note:

These sections provide a comprehensive guide to the design and construction of sustainable buildings, focusing on the planning, design, materials, performance monitoring, and certification aspects. The figures and tables are integral to understanding and implementing the principles outlined in each section.
