

Solarize

Ventura County

If you have been thinking about going solar but aren't sure who to hire, what to buy or how to get the best price possible, **we can help!**

Solarize Ventura County is a community-led program brought to you by the Community Environmental Council in partnership with the Ventura County Regional Energy Alliance that makes it easier and more affordable for local homeowners to go solar.

Solarize Ventura County offers homeowners a **limited-time discounted price** for solar systems from vetted local solar companies and a free independent solar advisor.

Solarize Ventura County 2017 is happy to announce our partnership with two vetted, local, solar companies, **California Solar Electric** and **Coastal Solar**.
